

## Newest MOH Equipment

Holding your company up to date with on hold messaging technology is certainly a necessity these days. For reduction in those early hang-ups and enabling your company to provide targeted audio marketing into the ear of captive and willing audiences can hardly be surpassed. All research tells us that as many as 80% more clients will stay on the line if they have something to listen to - especially for real information. And if you have not yet enabled your company to meet these needs, here is some of the latest technology in the field of MOH. All now comes with an internet connection it seems. The On-hold message players are certainly no exception. All these devices allow your on-hold production to be created by a production company thousands of miles away, and your messages can be put on-line in your business in a matter of business. We don't even need to lift a finger. The downloadable content on hold messaging companies is certainly nothing new, but instead of providing your on hold production on a cassette tape, it will now be provided on a CD, DVD, or memory card in an industry standard wav or .mP3 format.

Numerous of the newer systems are now USB Flash Drive compatible and your music-on-hold production can easily be transferred to it by using drag and drop from your computer. Few companies are now developing systems that will provide you with the ability to make your own special daily announcements. All the devices enable automatic answering with a greeting, give you extension capabilities, and a wide range of options while your callers remain on hold. Every on hold messages allow you to customize the message with daily information such as: weather reports, school closings, event calendars, daily specials at the restaurant, employees of the week, and so much more. Pretty some buyers try to use inexpensive CD players for their music or advertising on hold, this type of arrangement could fail them - and they may even not know it. This unit, however, is susceptible to interruptions, or power failures. All these units are not designed to operate continuously, 24 hours a day, 7 days a week for years on end. Until you can actually hear your messages being played - you would never even know what happened, no one going to let you know that your on-hold message is no longer playing...your customers? As professional and reliable service, you need professional equipment. Numerous on hold message production houses will be glad to help you - for free, and if not they certainly can refer you to their hardware expert. As to stay in the industry newest equipment for all is needed.
